ABOUT ALMEX

Who we are?

- A Mexican JV of ADM and Tate & Lyle

TATE & LYLE

Our raw material

Our main products

HFCS

CORN SYRUP

STARCH

DEXTROSE

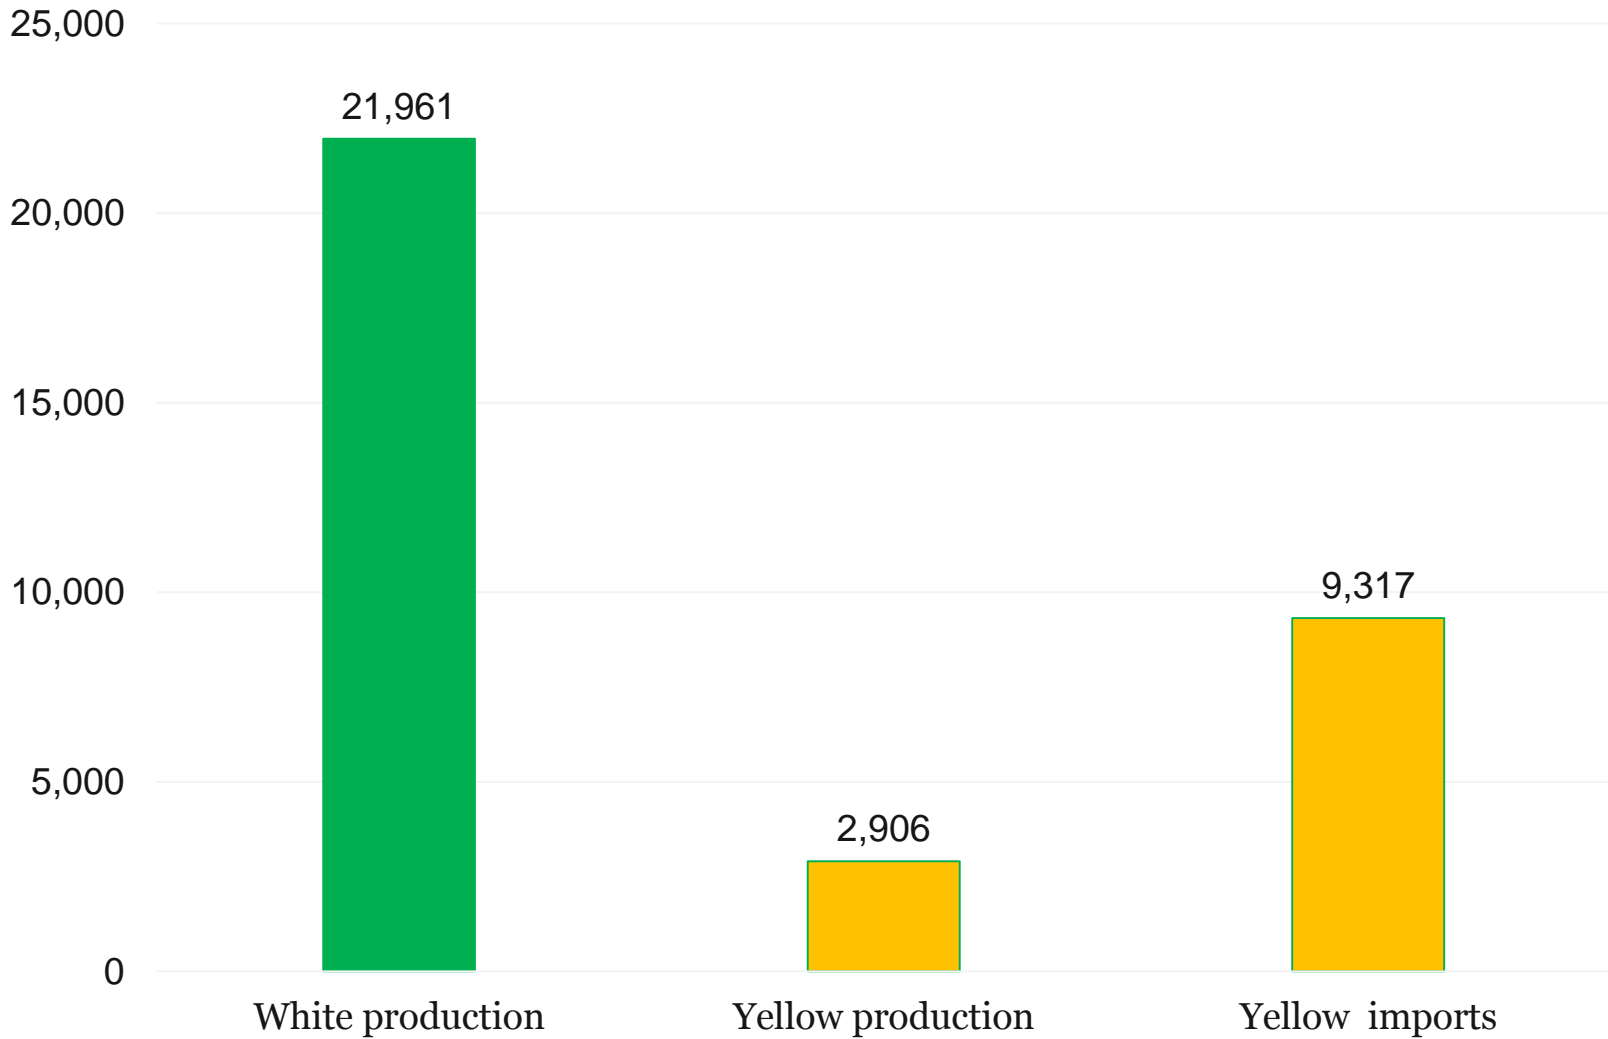

OIL

CORN OVERVIEW IN MEXICO

Corn availability 2015

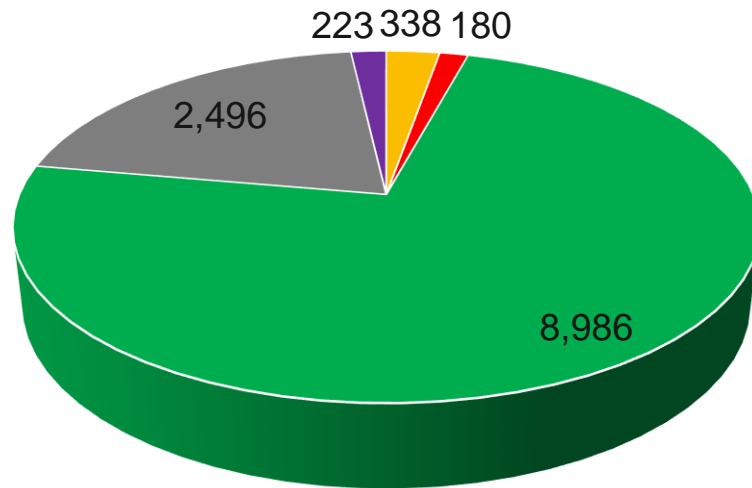

**Thousand tons*

Corn consumption

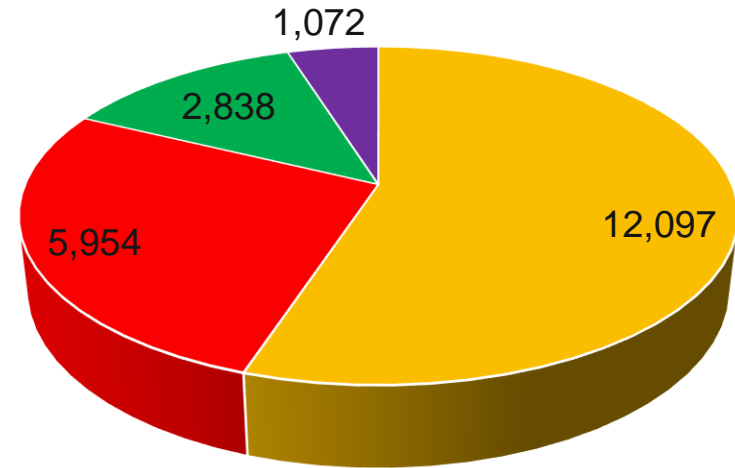

YELLOW CORN

- Human
- Livestock
- Other uses
- Self-consumption
- Industrial

TOTAL: 12,223

WHITE CORN

- Human
- Livestock
- Other uses
- Self-consumption

TOTAL: 21,961

*Thousand tons

CORN QUALITY

US Yellow corn No 2 parameters

Parameters	Max
Moisture	15%
BCFM	3%
Total damage	5%
Alfatoxin	20 ppm

**Five cars composite*

Yellow corn parameters

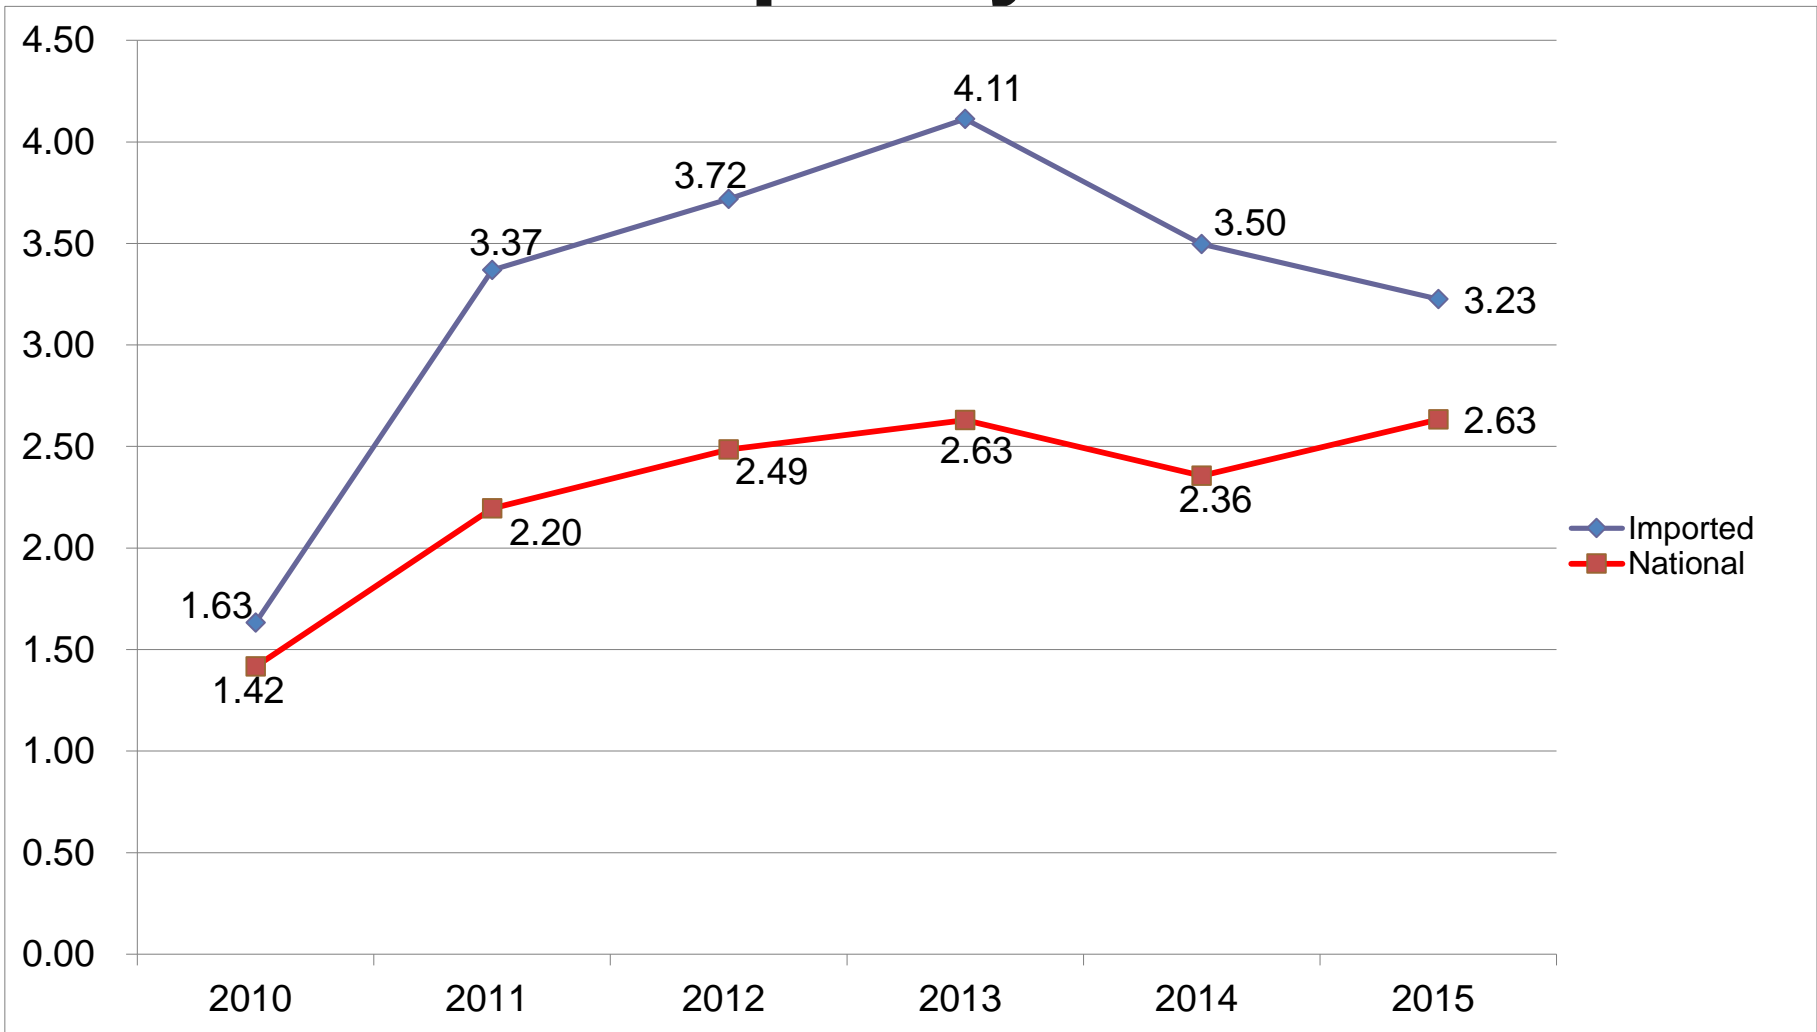

ALMEX PROFILE

Mycotoxin	Units	National yellow corn	Imported yellow corn
Alfatoxin	ppb	1 to 8	<2
Vomitoxin	ppm	<.3 to 2.5	<.3 to 0.6
Fumonisin	ppm	<.3 to 0.6	<.3 to 0.6
Zearalenone	ppb	20 to 200	<50

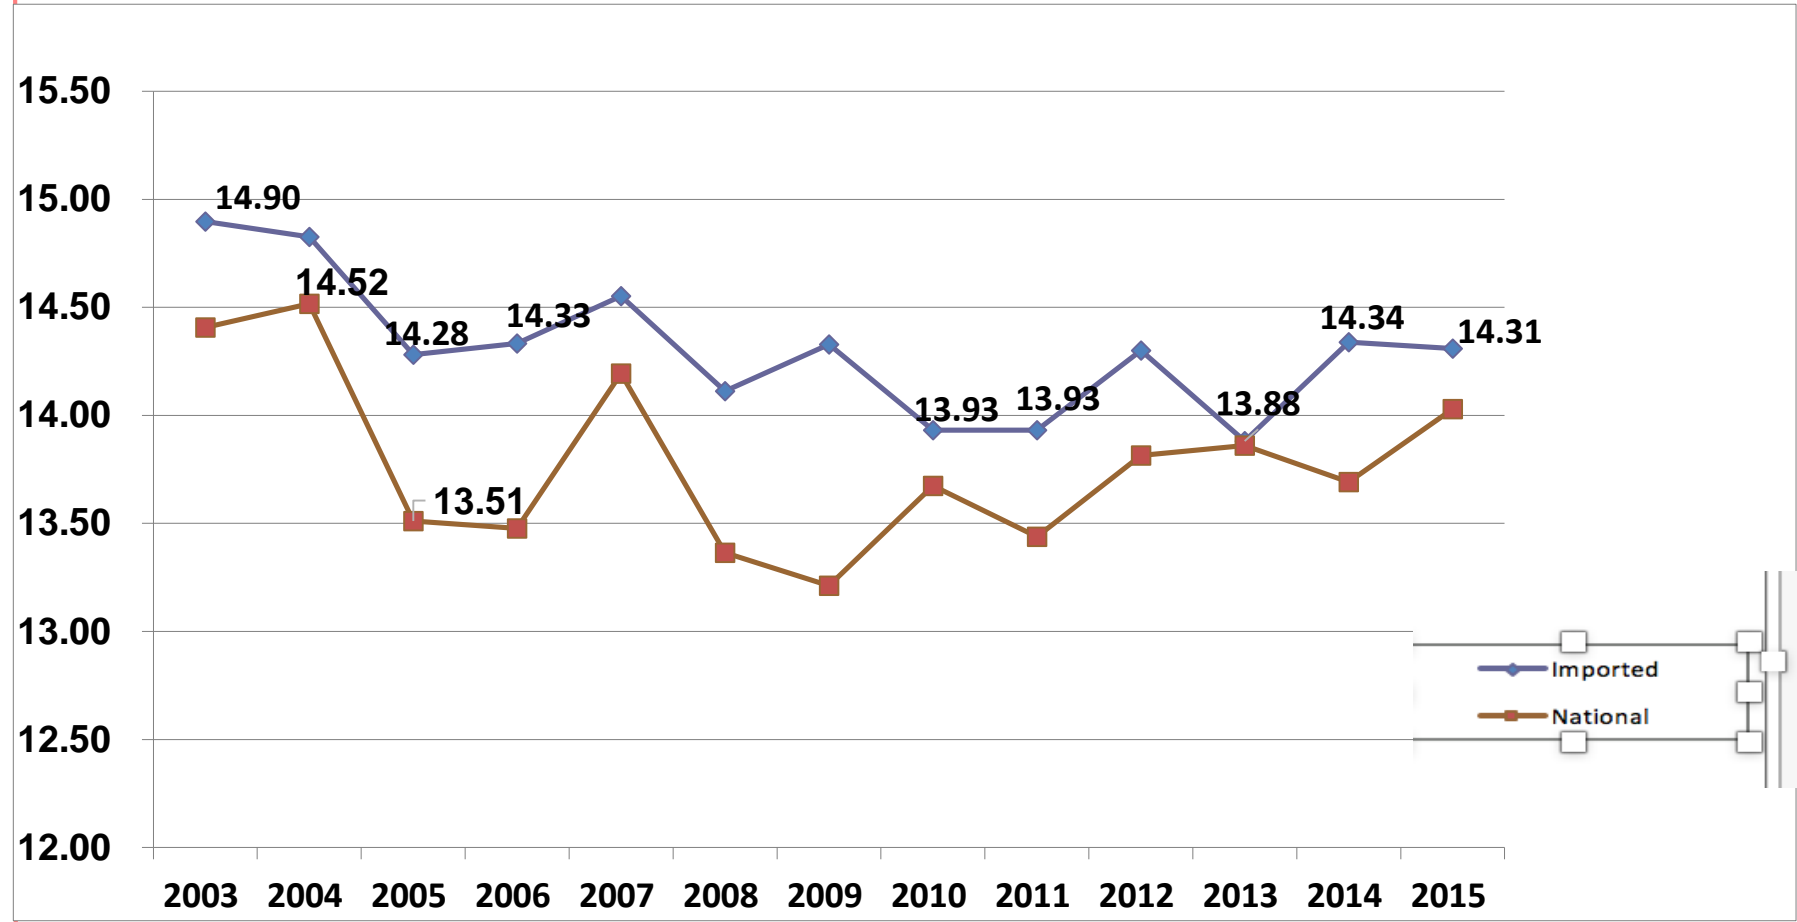

FDA STANDARDS

Mycotoxin	Max
Alfatoxin	20 ppb
Vomitoxin	5 ppm
Fumonisin	10 ppm
Zearalenone	200 ppb

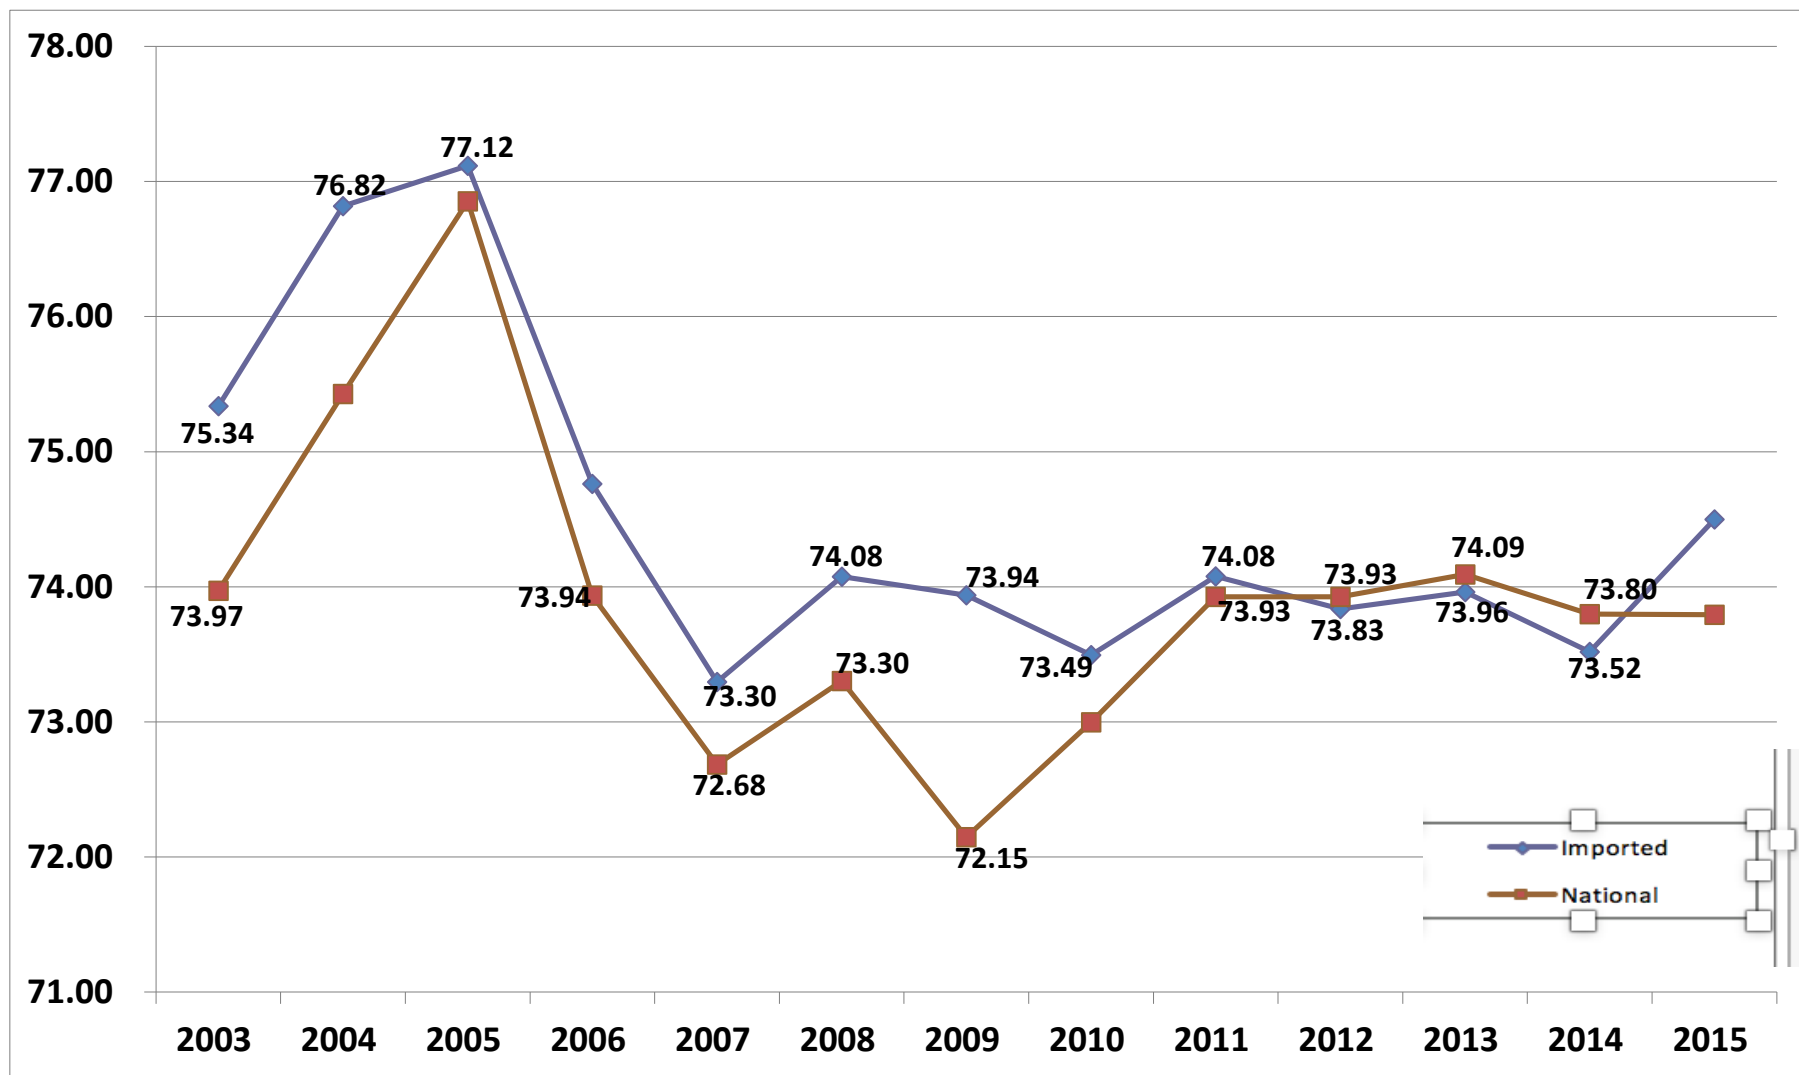

Yellow corn impurity %

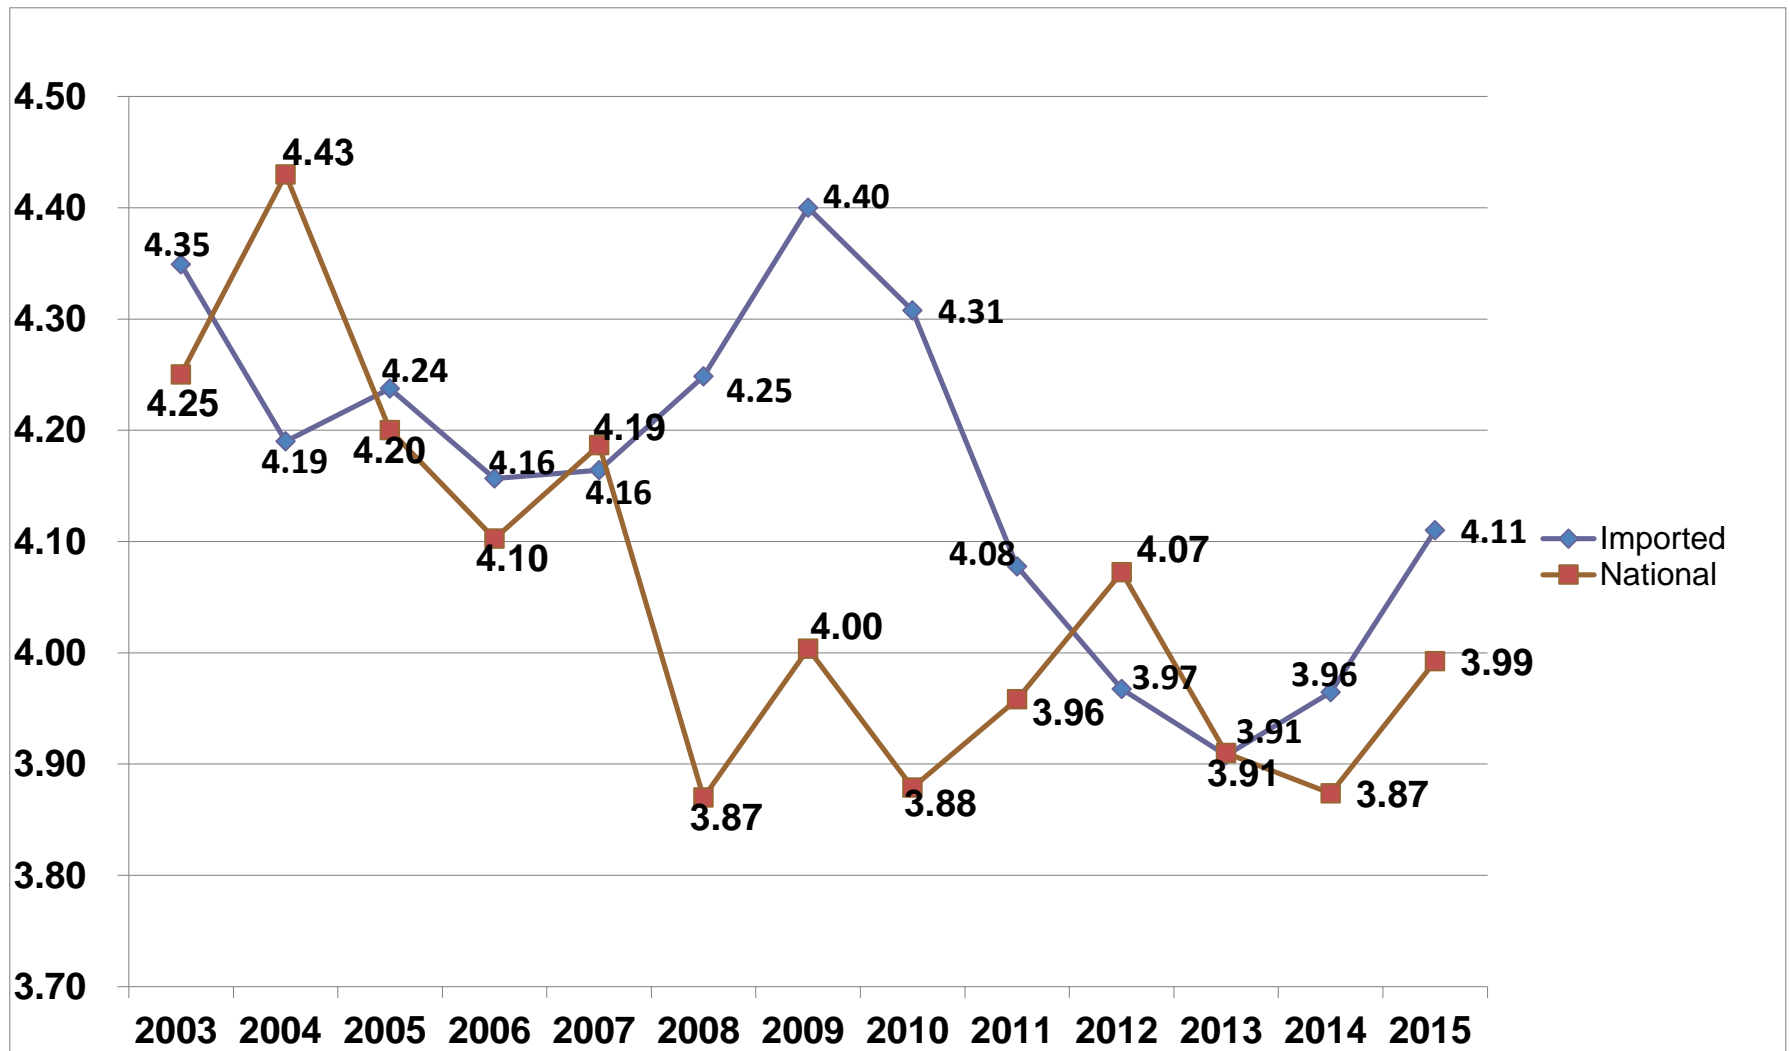

Yellow corn moisture %

Yellow corn starch %

Yellow corn total damage %

REGULATIONS

GMOs and Soil

- Planting GMOs products is prohibited in Mexico.
- However, Mexico allows GMOs product imports.
- Pilot program of grain Mobilization

- Zero tolerance of soil presence
- economic impact

TRENDS

Sustainable agriculture principles

Environment

- Reducing CO2 emissions
- Water management
- Rainforest protection

Community

- Human rights
- Eliminate discrimination

Management systems

- Good agricultural practices
- Harvest and postharvest handling
